OCT 19 2003

Federal Communications Commission
Office of the Secretary

To: The Chief, Allocations Branch, Media Bureau

PETITION FOR RULEMAKING

Blue Chip Broadcasting Licenses II, Ltd. ("Blue Chip"), licensee of radio station WGZB-FM, Corydon, Indiana, by its attorneys, and pursuant to Section 1.420(i) of the Commission's rules, hereby requests that the Commission initiate a rulemaking proceeding to amend the FM Table of Allotments by deleting Channel 243A from Corydon, Indiana, adding Channel 243A at Lanesville, Indiana, and modifying WGZB-FM's license to specify operation on Channel 243A at Lanesville. The proposed changes would result in a preferential arrangement of allotments, would provide the community of Lanesville with its first local transmission service and would have no impact on reception service because the transmitter site would remain the same. Blue Chip will file an application for Channel 243A at Lanesville if the channel is allotted to that community and, upon grant of a construction permit, will promptly operate a WGZB-FM facility on Channel 243A at Lanesville.

DISCUSSION

Under Section 1.420(i) of the Commission's rules and the Commission's community of license change policies, the Commission may modify a station's license to specify a new

No. of Copies rec'd
 List ABCDE

0+4
 FM-MB
 03-379

community of license without affording interested parties an opportunity to file competing expressions of interest if (a) the proposed community of license is an identifiable community; (b) the new allotment would be mutually exclusive with the old allotment; (c) looking at the totality of factors, the new allotment would result in a preferential arrangement of allotments; and (d) the relocation would not deprive a community of its sole local transmission outlet. *See Modification of FM and TV Authorizations to Specify a New Community of License*, 4 FCC Rcd 4870 (1989) (“*Community of License Change Order*”), *recon. granted in part*, 5 FCC Rcd 7094 (1990) (“*Community Recon Order*”); *LaGrange and Rollingwood, Texas*, 10 FCC Rcd 3337 (1995). The community of license change proposed by Blue Chip would satisfy all of these criteria.

I. Lanesville Is a Community Deserving of an FM Channel Allotment.

Lanesville, Indiana, is an incorporated town with a population of 614 persons according to the 2000 U.S. Census. *See* Exhibit B attached hereto. Located in Harrison County, Indiana, Lanesville was established in approximately 1870. Lanesville has its own zip code (47136) and post office. *See* Exhibit C. Lanesville is governed by a three-member elected Town Board, of which one member serves as President of the Board. Lanesville also has a Clerk/Treasurer and a town hall facility. Lanesville has its own water and sewer services, and is served by its own local volunteer fire department and town marshal. *See* Exhibit C.

Lanesville residents support four churches (including St. John’s Lutheran Church, St. Mary’s Church, Lanesville-New Crandall Methodist Church and Harrison Hills Baptist Church). Lanesville also has several significant businesses, including Zabel’s Hardware, which opened in 1917. Lanesville has a bank (Farmers State Bank) and two insurance brokers. Lanesville also has two home builders (Blocker Construction and Fulkerson Construction), two lawn care services (Rayray’s Lawn Service and WH Lawn Care) and a carpet cleaning and general contractor service (Servpro). Lanesville is also home to a driveway repair company (Sealcoat), a

furniture mart (Creskide Country Furniture), an interior design firm (Jabots), an architect (Don Baldwin), a food market (Lanesville Food Mart), two restaurants (K & H Café and Mill Restaurant), a photographer (Sonshine Studio), a pet hospital (Animal Hospital of Lanesville), a pet border (Happy Tails Pet Resort), and a gas station (Lanesville Service Station). Lanesville is also home to an apartment complex and a mobile home park. *See* Exhibit D.

Lanesville has two doctors and a family medical center as well as its own elementary school (Lanesville Elementary School), junior-senior high school (Lanesville Junior and Senior High School) and school superintendent. There is also a Lutheran school in Lanesville. *See* Exhibits C and D.

Lanesville easily satisfies the criteria for a “community” deserving of an FM allotment, possessing a greater population and more community attributes than many communities to which the Commission has allotted channels in the past. *See Blanket, Texas*, DA 03-155, MB Docket No. 02-351, RM-10601 (rel. Jan. 17, 2003) (allotting channel to Blanket, “population of over 442 people”); *San Isidro, Texas*, 2002 FCC LEXIS 6503, MM Docket No. 01-305, RM-10310 (rel. Dec. 9, 2002) (allotting channel to San Isidro, population 208). Under these circumstances, Lanesville is unquestionably a community and is entitled to its first local transmission service.

II. The New Allotment Is Mutually Exclusive With the Existing Allotment.

WGZB-FM is licensed to operate on Channel 243A (96.5 MHz) at Corydon. Blue Chip proposes to delete Channel 243A at Corydon and add Channel 243A at Lanesville, with no change in transmitter site.¹ Channel 243A can be allotted to Lanesville in conformity with the minimum spacing requirements of Section 73.207(a) of the Commission’s rules, and from the proposed reference site (*i.e.*, the existing transmitter site), WGZB-FM would provide the

¹ Blue Chip has an application pending to modify WGZB-FM’s licensed facilities (FCC File No. BPH-20030724ABV). The proposed modifications would be implemented at the station’s licensed site.

required 70 dBu signal over Lanesville. *See* Technical Exhibit by Graham Brock, Inc. (attached hereto as Exhibit A), at page 2 & Ex. 1. The minimum required spacing between co-channel Class A stations under the Commission's rules is 115 kilometers (71 miles). *See* 47 C.F.R. § 73.207(a). Because Blue Chip does not propose a change in transmitter location, the new allotment would be mutually exclusive with the existing allotment. *See* Exhibit A.

III. The Proposed Change Would Result in a Preferential Arrangement of Allotments.

There are no radio or television stations licensed to Lanesville; WGZB-FM would be the community's first local aural transmission service. Following WGZB-FM's reallocation to Lanesville, Corydon would continue to be served by stations WOCC(AM) and WSFR(FM), Corydon, Indiana. Thus, the reallocation of WGZB-FM to Lanesville will not remove Corydon's sole local transmission service.

Deleting Channel 243A at Corydon and adding Channel 243A at Lanesville will result in a preferential arrangement of allotments.² Retaining the Channel 243A allotment as a third local service at Corydon would serve priority (4), other public interest matters, while adding Channel 243A at Lanesville would serve priority (3) by providing a first local transmission service to that community. Again, because Blue Chip does not propose a change in transmitter site, there will be no gain or loss areas (in coverage or listeners). *See* Exhibit A.

IV. Tuck Standard Met Though Analysis Not Required

Lanesville is not located within any census-designated Urbanized Area. *See* Exhibit E. From the proposed transmitter site (*i.e.*, the current transmitter site), a theoretical 70 dBu contour based on a maximum six kilowatt Class A facility would encompass only 7.7% of the Louisville

² The Commission's allotment priorities are (1) first full-time aural service; (2) second full-time aural service; (3) first local service; and (4) other public interest matters. Equal weight is given to priorities (2) and (3). Community of License Change Order, 4 FCC Rcd at 4876, fn. 8.

Urbanized Area. *See* Exhibit A. As presently authorized, WGZB-FM provides service to only 3.3% of the Urbanized Area. *See id.*³ Because WGZB-FM would not be within an Urbanized Area or cover more than 50% of an Urbanized Area with its 70 dBu contour, no analysis is required to determine Lanesville's independence from a central city as set forth in *Faye & Richard Tuck*, 3 FCC Rcd 5374 (1988) ("*Tuck*"). However, in an abundance of caution, we provide a *Tuck* showing below. As established below, Lanesville is fully independent from Louisville, Kentucky.

Under *Tuck*, the Commission utilizes three criteria to determine whether or not the proposed community of license is entitled to a first local service priority: (1) signal population coverage; (2) relative size and proximity of the communities; and (3) the interdependence of the suburban community with the central city.

As discussed above, under the first criterion the reallocation of WGZB-FM to Lanesville at the station's licensed site would not provide 70 dBu service to more than 50% of the Louisville, Kentucky Urbanized Area. *See Amendment of Section 73.202(b), FM Table of Allotments (Headland, Alabama and Chattahoochee, Florida)*, 10 FCC Rcd 10352 (rel. Sept. 19, 1995). Under the second criterion, Lanesville (town with a population of 614 according to the 2000 U.S. Census) is located approximately an 18 mile drive from Louisville (population of 256,231 according to the 2000 U.S. Census). *See* Exhibit B. According to a Lanesville town representative, the intervening 18 miles between Louisville and Lanesville is made up of several distinct villages and distances of commercially undeveloped land. Lanesville and Louisville are also separated by the Ohio River and corresponding Indiana-Kentucky state border. In addition, maps of the area indicate distinct towns in the area between Louisville and Lanesville (in

³ The modified WGZB-FM facility proposed in BPH-20030724ABV also would provide service to well below 50% of the Louisville Urbanized Area. *See* Exhibit A.

addition to the Ohio River). *See Rand McNally Road Atlas* (2002).

As the Commission stated in *Tuck*, the most important consideration is the independence of the specified community from the central city. The FCC relies on the following characteristics when assessing independence: (1) the extent to which community residents work in the larger metropolitan area rather than the specified community; (2) whether the smaller community has its own newspaper or other media that covers the community's local needs and interests; (3) whether community leaders and residents perceive the specified community as being an integral part of, or separate from, the larger metropolitan area; (4) whether the specified community has its own local government and elected officials; (5) whether the smaller community has its own telephone book provided by the local telephone company or zip code; (6) whether the community has its own commercial establishments, health facilities, and transportation systems; (7) the extent to which the specified community and the central city are part of the same advertising market; and (8) the extent to which the specified community relies on the larger metropolitan area for various municipal services such as police, fire protection, schools, and libraries. All eight factors need not favor the applicant; however, if a majority of the factors demonstrate that the specified community is distinct from the urbanized area, the Commission will treat it as an independent community. *See Parker and Port St. Joe, Florida*, 11 FCC Rcd 1095, 1096 (1996).

(1) *Extent to which community residents work in the larger metropolitan area.* As discussed in Section I above, Lanesville is home to several local businesses. U.S. Census data for 2000 indicates that approximately 30% of the residents of Lanesville work in Harrison County, where Lanesville is located.⁴ *See Exhibit B.* This is a far higher percentage than those in previous *Tuck* showings approved by the Commission. *See Anniston and Ashland, Alabama*,

and College Park, Covington, Milledgeville and Social Circle, Georgia, 16 FCC Rcd 3411, 3413 (2001) (finding that “16% of the [community] workforce is sufficient to support a favorable finding on” the factor of residents working in the community in which they live).

(2) *Newspaper or other media.* Currently, no radio or TV stations specify Lanesville as their community of license. Lanesville does not have its own newspaper, but is served by the newspaper from nearby Corydon, Indiana, *The Corydon Democrat*. Further, the Lanesville Community Schools operate their own website which includes information about school events as well as Lanesville’s Heritage Weekend celebration (www.lanesville.k12.in.us/index.htm). Thus, Lanesville residents need not depend on Louisville media to cover local Lanesville issues and concerns.

(3) *Whether community leaders and residents perceive themselves as separate from the larger metropolitan area.* Ashville was incorporated in approximately 1870. Zabel Hardware has been open and operating in Lanesville since 1917. Lanesville puts on an annual Heritage Weekend event and the Lanesville Community Schools website indicates several other community oriented school events and activities. Lanesville is home to four churches and the Lanesville Clerk/Treasurer has stated that the town considers itself separate and distinct from Louisville. Lanesville is an 18 mile drive from Louisville, and as stated above, according to the Lanesville Clerk/Treasurer, the area between Louisville and Lanesville is at points desolate and without continuous commercial or residential development.

(4) *Local government and elected officials.* Lanesville has its own local government and elected officials. Lanesville is governed by an elected three-member town board, one of whom is president of the board. Lanesville also employs a Clerk/Treasurer. Lanesville’s local government is housed in a town hall with town governmental offices.

⁴ Louisville, by contrast, is in Jefferson County, Kentucky.

(5) *Telephone book or zip code.* Although Lanesville is not issued its own telephone book from the local telephone company, Lanesville is listed in the Corydon/Salem, Indiana telephone book. Lanesville has its own post office and its own designated zip code: 47136. *See Exhibit C.*

(6) *Commercial establishments, health facilities, and transportation systems.* As described above, Lanesville is home to significant commerce. Lanesville has a bank, two insurance brokers, two home builders, two lawn care services and a carpet cleaning and general contractor service. Lanesville has Zabel's Hardware, a driveway repair company, a furniture mart, an interior design firm and an architect. Lanesville also has a food market, two restaurants, a pet hospital and a gas station. Lanesville is also home to an apartment complex and a mobile home park. Lanesville also has two doctors and a family medical center. Although Lanesville does not have a municipal transportation system, it does not rely on the transportation system of any other municipality, including Louisville. *See Exhibit D.*

(7) *Advertising market.* There is no formal data available regarding Lanesville's advertising markets. However, according to the Clerk/Treasurer, Lanesville businesses are most likely to advertise in *The Corydon Democrat*, not the Louisville newspaper.

(8) *Reliance on the larger metropolitan area for municipal services.* Lanesville has significant municipal services and does not rely on Louisville for such services. Lanesville has its own water and sewer facilities and services. Lanesville is served by its own local volunteer fire department and its own town marshal.

Lanesville has its own public elementary school, its own junior and senior high school and its own superintendent of schools. Lanesville children can also attend a Lutheran school. *See Exhibit C.*

CONCLUSION

Lanesville, Indiana is a community deserving of a first local transmission service. By reallocating WGZB-FM to Lanesville, area listeners will experience no change in service (no loss or gain). The new allotment is mutually exclusive with WGZB-FM's existing facilities in Corydon and would result in a preferential arrangement of allotments. Corydon will continue to have local transmission service. Finally, though a *Tuck* analysis is not required in the present situation, Lanesville is indisputably an independent community, separate and distinct from the Louisville, Kentucky Urbanized Area.

Accordingly, Blue Chip requests the Commission initiate a rulemaking proceeding to delete Channel 243A at Corydon and add Channel 243A at Lanesville as set forth below:

Channel Number		
Community	Present	Proposed
Corydon, Indiana	243A	--
Lanesville, Indiana	----	243A

Blue Chip will file an application for Channel 243A at Lanesville if the channel is allotted to that community and, upon grant of a construction permit, will promptly construct and operate a WGZB-FM facility on Channel 243A at Lanesville.

Respectfully submitted,

BLUE CHIP BROADCASTING LICENSES II, LTD.

ENGINEERING STATEMENT

PETITION FOR RULE MAKING
BLUE CHIP BROADCASTING LICENSES II, LTD.
RE-ALLOT CHANNEL 243A
LANESVILLE, INDIANA
November 2003

TECHNICAL STATEMENT

1. This technical statement and attached exhibits have been prepared on behalf of Blue Chip Broadcasting Licenses II, Ltd. ("Blue Chip"), licensee of WGZB-FM, Channel 243A, Corydon, Indiana.¹ Blue Chip herein requests that Channel 243A be re-allotted to Lanesville, Indiana, as that community's first local licensable FM station. The proposed re-allotment will not remove the sole operating service from Corydon (as detailed below). The proposed allotment to Lanesville (Channel 243A) is mutually exclusive with the present WGZB-FM allotment at Corydon, Indiana.

DISCUSSION

2. The community of Lanesville, Indiana, is located in the southeastern portion of Harrison County, Indiana. Lanesville has a population of 614 persons, based on 2000 U.S. Census data. The town of Lanesville is governed by a three member town board. The town provides water, sewer and fire services to its residents. There are numerous businesses, churches and residential areas in Lanesville. There are currently no full-time AM or FM services licensed to the community. Further, Lanesville is not located in any Urbanized Area and is designated a town, as defined by the U.S. Census of Indiana/Kentucky.

1) There is a pending application to make minor changes to the facilities of WGZB-FM (BPH-20030724ABV). The proposed changes are to be implemented at the present licensed site of WGZB-FM.

PROPOSAL

3. Channel 243A can be allotted to Lanesville, Indiana, with a site restriction of 3.7 kilometers southwest to avoid shortspacing WJAA, Channel 242A, Austin, Indiana, and to specify the existing WGZB-FM transmitter site. The reference site for the proposed allotment of Channel 243A at Lanesville, Indiana, is North Latitude 38° 12' 52" and West Longitude 86° 01' 00". Attached as Exhibit #1 is a §73.207 spacing study for Channel 243A at Lanesville that shows the proposed channel meets the Commission's minimum distance separation requirements to all licensed, applied for or proposed facilities (with the exception of the licensed and applied for WGZB-FM facility at Corydon). Attached as Exhibit #2 is a map depicting the area to locate a transmitter site for Channel 243A at Lanesville, Indiana. From the proposed reference site/authorized WGZB-FM, a 3.16 mV/m (70 dBu) signal will be provided over Lanesville.²

4. Therefore, Blue Chip herein requests the following changes in §73.202 of the Commission's rules.

Lanesville, Indiana

Present	Proposed
None	243A

Corydon, Indiana

Present	Proposed
243A, 299B1	299B1

2) Based on both the licensed and applied for WGZB-FM.

PUBLIC INTEREST

5. The allotment of Channel 243A to Lanesville, Indiana, will provide that community with its first locally licensable station, without depriving Corydon of its only local service, since FM station WSFR, Channel 299B1, and AM station WOCC, 1550 kHz, will remain licensed to Corydon, Indiana. A re-allotted WGZB-FM operating on Channel 243A at Lanesville, Indiana, will provide 60 dBu (1.0 mV/m) service to 503,457 persons in 2,516.1 square kilometers (based on uniform terrain).³ Since no change in transmitter site is proposed, there is no gain or loss area created by this proposal. Once Channel 243A is allotted to Lanesville, Indiana, Blue Chip will submit the required application to implement the change in community of license.

6. The community of Lanesville is not located in an Urbanized Area, as designated by the United States Census. However, from the proposed reference site/authorized transmitter site of WGZB-FM, a theoretical 70 dBu contour (based on a maximum 6.0 kilowatt Class A with uniform terrain) would encompass 7.7 % of the Louisville, Kentucky/Indiana Urbanized Area.⁴ As can be seen on the Exhibit #3, the theoretical 70 dBu contour from the proposed Lanesville allocation site (with no terrain features) extends a small amount into the Louisville Urbanized Area. However, as presently authorized, WGZB-FM provides service to only 3.3% of the Louisville Urbanized Area.⁵ Therefore, since these percentages are well below 50% coverage of

-
- 3) The proposed WGZB-FM facility, BPH-20030724ABV, will provide 60 dBu service to 551,480 persons in 2,473.5 square kilometers. The present licensed WGZB-FM covers 400,234 persons in 1,824.8 square kilometers within its 60 dBu contour.
 - 4) The map of the Urbanized Area boundary for Louisville was downloaded from the U.S. Census Bureau as defined in the 2000 Census. A copy of the map is attached as Exhibit #4.
 - 5) The proposed WGZB-FM facility, as requested in BPH-20030724ABV, will also provide service to well below 50% of the Urbanized area.

the Louisville Urbanized area, a Tuck Analysis is not necessary. However, out of an abundance of caution, a Tuck showing has been conducted and is incorporated into the legal portion of this instant request.

7. The foregoing technical statement was prepared on behalf of Blue Chip Broadcasting Licenses II, Ltd., by Graham Brock, Inc., its Technical Consultants. All data related to FM facilities was extracted from the CDBS database. All population data was extracted from the 2000 U.S. Census database, PL 94-171 files. We assume no liability for errors or omissions in that database that may be adverse to the requests contained herein.
